1	On 29 June 1954, about 50 MiG-15s and U-MiG-15s were parked in two groups at Finow airfield east of the flight control station. The alert flight of 4 MiG-15s, including 2 was parked at the runway. Ten to 12 single-engine aircraft were observed west of the flight control building. Between 1100 and 1500 on 30 June, local individual flights were made by 3 MiG-15s. Titled 2140 and 2230 on 1 July, flying was practiced by MiG-15s while two searchlights were in operation. The searchlights were probably located in the western section of the field about 1 km apart. On 5 July, an estimated 65 aircraft, including at least 45 MiG-15s and U-MiG-15s were parked at the field. No additional air activity was observed up to 9 July. 1	25X1 25X1
	roups at Finow airfield east of the flight control station. The alert flight of 4 MiG-15s, including 2 was parked at the runway. Ten to 12 single-engine aircraft were observed west of the flight control building. Between 1100 and 1500 on 30 June, local individual flights were made by 3 MiG-15s.** Title 12140 and 2230 on 1 July, flying was practiced by MiG-15s while two searchlights were in operation. The searchlights were probably located in the western section of the field about 1 km apert. On 5 July, an estimated 65 aircraft, including at least 45 MiG-15s and U-MiG-15s were parked at the field. No additional air activity was observed up to 9 July. 1 2. On 5 July, a Fishnet-type radar set on a mast, about 8 meters high, was observed at the eastern edge of the field, just south of the runway. About 50 meters west of this set, on the western side of the short runway was a truck mouting a model AA 4 MK 3 set. On 29 June, the Token-type radar set was still observed on triangulation point 71.5 at the Eberswalde-Sommerfelde road. 2 In early July, the AA gun emplacement in the southeastern section of the field was still occupied by 6 x 37-mm AA guns. 3

	30 June. Between 0800 and 1800, about 60 take-offs were nade by	
	NiG-15s and U-MiG-15s. Local individual flights and formation	
	flights in elements of two and wedge formation were observed.	
	After 2000, night flying activity was heard.	
	1 July. Between 0730 and 1900, local and formation flights were	
	made. Sixty to 70 take-offs were counted.	
	6 July. Fetween 0300 and 2000, 35 take-offs were counted. The	
	same flights were made as on the preceding days in addition to	
	firing at towed sleeve targets in the Werbellinsee area. Night	
	flying was practiced after 2000.	
	7 July. Thirty-five to 40 take-offs were made.	
	Tours, filligative to to care-ours ware unie.	
	14. 16 and 17 July. Twenty-five take-offs were conducted by	
	MiG-15s and U-MiG-15s each day. On 17 July, the following sirenaft	
	were counted at the field: 4 alert FiG-15s in the northeestern	
	corner and 19 MiC-15s and U-MiC-15s on the northern edge, An	
	additional 25 to 30 MiG-15s and 8 Yak-lls were estimated on the	
	northern edge. At the same time, 4 swept-back jet aircraft were	
	aloft. 1

	a small elevation north of the Eberswalde - Bad Freienwalde road,	
	about 600 meters northeast of Sormerfelde. Formerly, a sound	
	locator of the German air defense had been located there. About	
	20 air force soldiers were employed in the radar station. 2	
	Almost throughout the day on 26 June, firing at towed sleeve	
	targets was practiced over the Ead Freienwalde area, Jot bombers	
	flying in the direction of Werneuchen attacked the sleeve target which was towed by a jet bomber at an altitude of 2,000 to 3,000	
•	meters. At each attack, 2 or 3 bursts of fire were given. Firing	
	from the tail gunner's position was not observed.	
		051/4
	Comment. Finow airfield is still occupied by a fighter division	25 X 1
	headquarters and 2 fighter regiments. The number of aircraft observed	
	at the field approximately agrees with the aircraft strength of 2	
	regiments. Air activity observed was carried out along the usual	
	pattern. The jet bombers engaged in firing at loved sleeve targets	
	probably are I1-28s of the bomber regiment stationed in Werneuchen.
